

INTERNATIONAL SPECIALIST CATALYTIC CONVERTER RECYCLING

Platinum Recoveries

Specialist recoveries of Platinum Group Metals from automotive catalytic converters and ceramic

The recycling of platinum group metals from automotive catalytic converters is an important contributor in the production of sustainability of these valuable materials. PRL is one of the world's leading companies in this environmentally sensitive form of urban mining. PRL has its own in-house specialist laboratory and a zero landfill recycling process, that obtains the maximum recovery from spent auto catalyst and PGM loaded ceramic. By using these processes, and our comprehensive database of 1000's of auto cats we not only give the best possible value and individual prices for your cats and ceramic but also the assurance that your material has been recycled professionally by a fully licensed environmentally compliant company.

Operating both nationally and internationally, from its UK purpose built facility in Swindon, we process materials quickly and efficiently. We provide on the spot site valuations for our UK customers who wish to process their PGM loaded ceramic, we normally are able to give a full result and a full payment within 24 hours of receiving the material!

More and more companies are choosing PRL as their recycling business partner, to find out why, ring 01793 828283 and let PRL deliver consistent and excellent prices for your material.

Platinum Recoveries is the UK's largest exclusive Catalytic Converter Recycler

OVERVIEW

The primary mode of operation is for PRL to purchase spent catalytic converters and ceramic from various sources including motor manufacturers, vehicle maintainers, vehicle breakers, collectors, waste companies and approved treatment facilities from within the UK and internationally.
